

Smart TAP

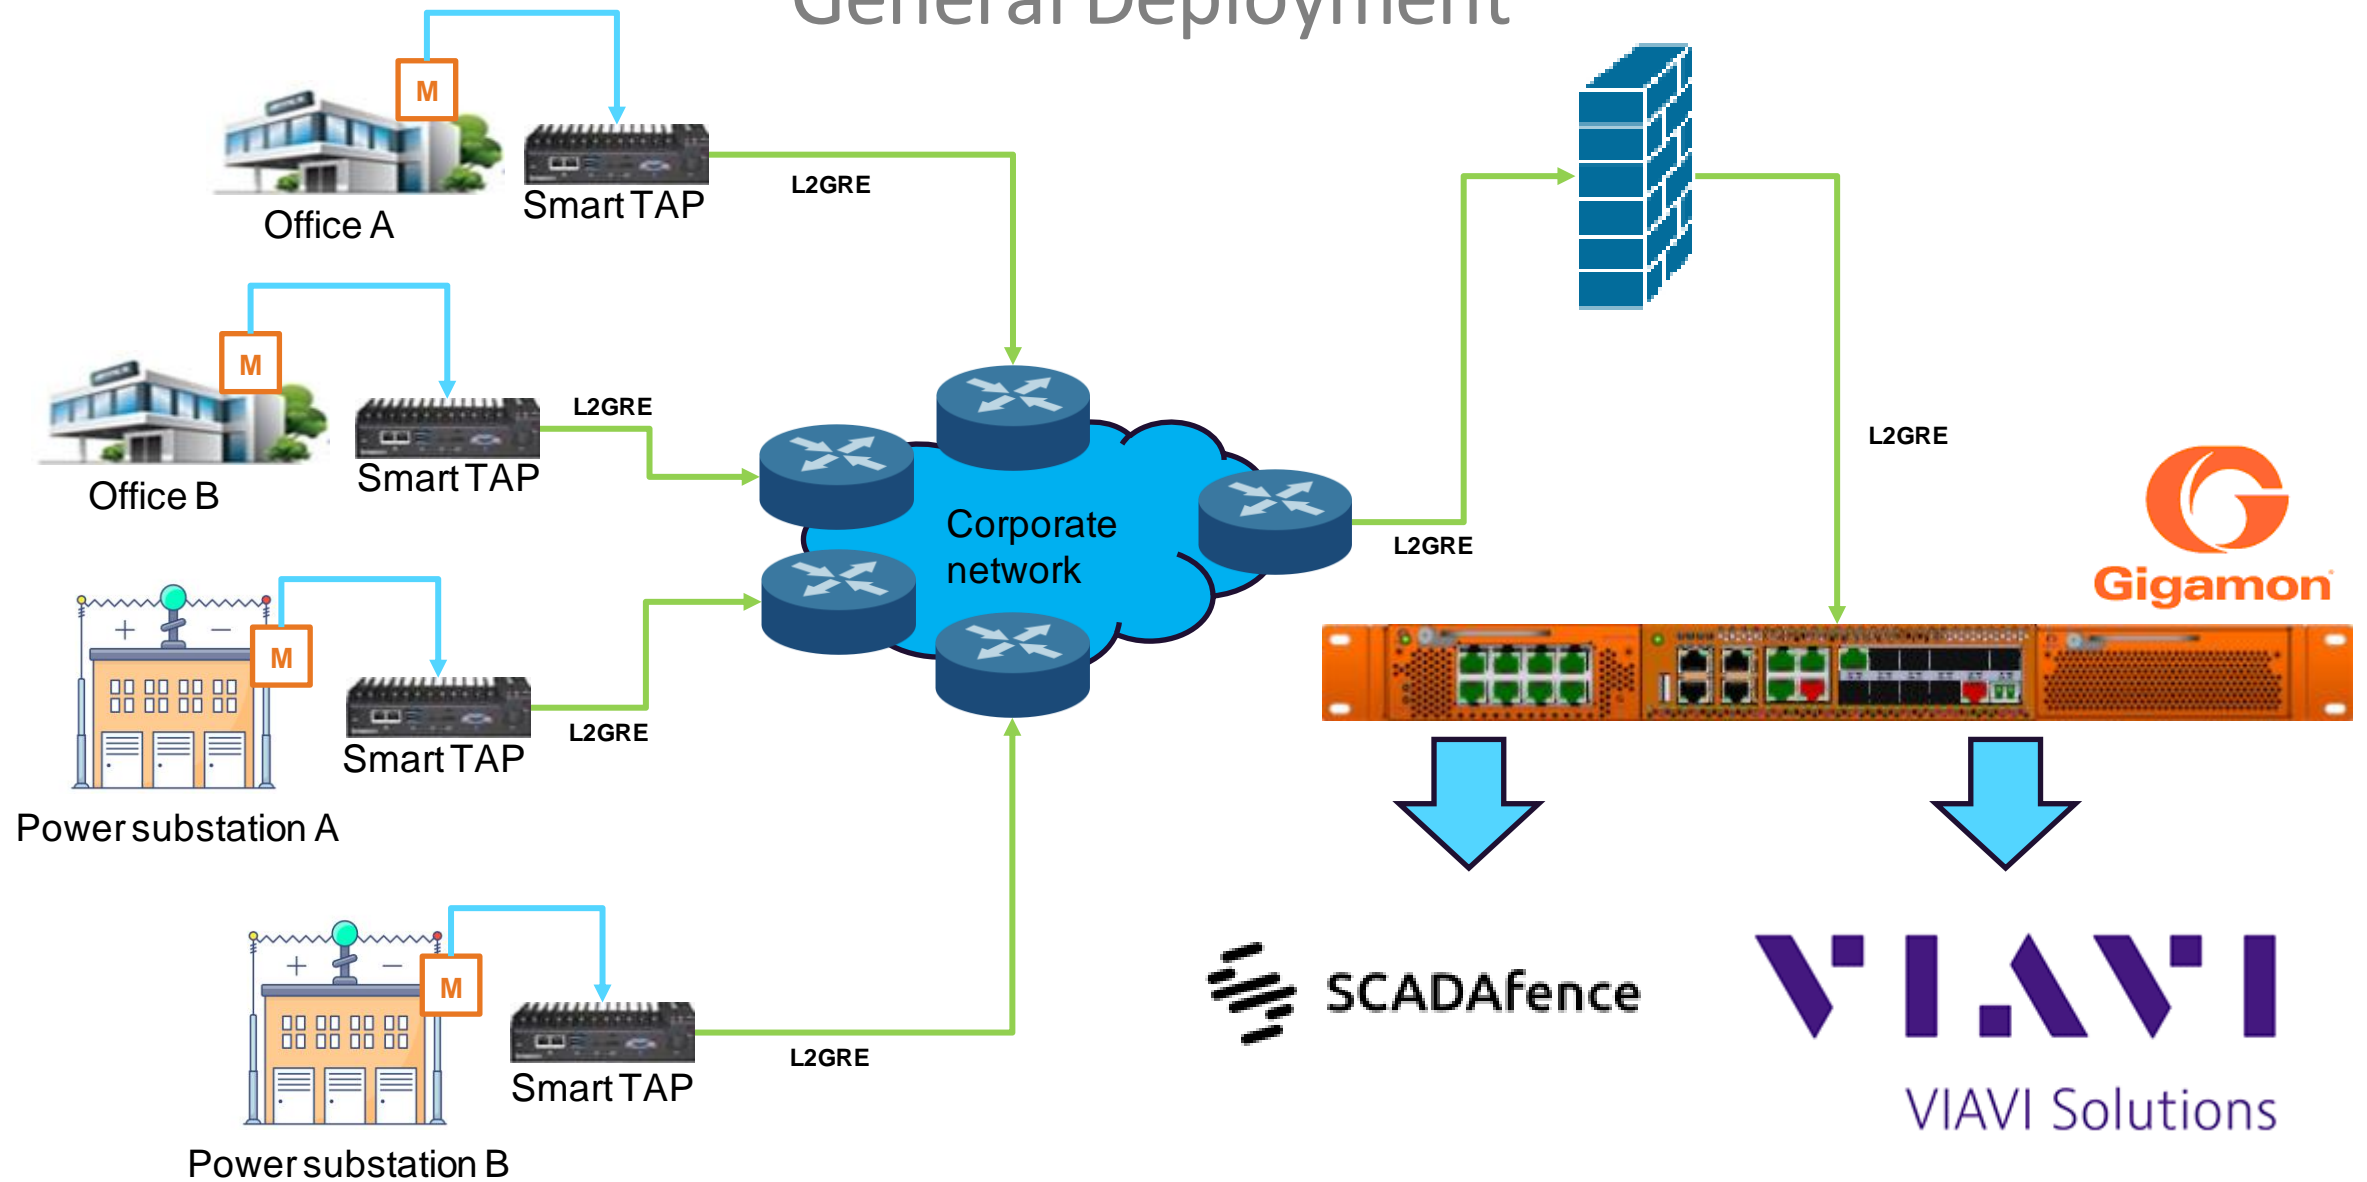

Collect, filter and transmit

Freddy Brito

The Problem

In certain situations, a simple, robust, and economically attractive device is needed to capture traffic in challenging locations such as electrical substations, water treatment plants, remote offices, oil rigs and many others, and deliver it to the Gigamon visibility platform.

General Deployment

Smart TAP

Architecture

Rules

- ✓ All
- ✓ IP
- ✓ IP + port
- ✓ Proto
- ✓ Proto + port
- ✓ VLAN

CLI

- ✓ Custom commands for configuration and visualization of: tunnel, interfaces and stats.

Features

- ✓ Nothing is kept in disk.
- ✓ Specs:
- ✓ HD requirement, max 30GB
- ✓ Min CPU Atom.
- ✓ Minimalist SW
- ✓ OS CentOS
